What People Say

"Zabbix is great, but the # of bugs in it can be frustrating."

- Zabbix user

"Nagios is very, very stable and, if you set it up right, pretty easy to maintain."

- Zabbix forums member

"With Nagios we were able to consolidate multiple commercial monitoring solutions into one, and at the same time reduce our maintenance costs."

- Manager IT Infrastructure Operations, Sunrise Communications

"Nagios is a fantastic system. It provides us the ability to provide a more proactive approach."

- Consultant, Waytime Technologies

The Better Solution

Nagios is the clear winner when it comes to monitoring and managing the challenges of your complex IT infrastructure. Learn more about how Nagios solutions can solve your toughest challenges by visiting the Nagios Solutions center at:

<http://www.nagios.com/solutions>

With Nagios you'll never be left having to explain why an unseen infrastructure outage hurt your organization's bottom line.

Nagios XI monitors your entire IT infrastructure to ensure systems, applications, services, and business processes are functioning properly. In the event of a failure, Nagios can alert technical staff of the problem, allowing them to begin remediation processes before outages affect business processes, end-users, or customers.

Nagios XI pricing starts at **\$595** and includes one year of support, maintenance, self-paced training access, and access to special customer-only downloads.
